

CCTV

Compliance File

Meeting your legal requirements

CCTV systems are used by many organisations for safety and security in a variety of public and private settings.

The compliance file locates the required documents in one place and is a cost-effective way of addressing compliance with the relevant legislation.

All CCTV systems that collect personal data are required to be registered with the Information Commissioner's Office (ICO) and the use of CCTV is covered by the Data Protection Act 2018 and subsequent regulations.

The compliance file contains the relevant documents and guidance.

- CCTV Needs Assessment
- CCTV Impact Assessment
- CCTV Policy
- Surveillance Camera Code of Practice
- Home Office Guidance
- CCTV Supporting Small Businesses
- CCTV In Operation Sign
- UK Police Requirements For Digital CCTV Systems

Our consultants would be happy to assist you with your specific requirements.
