

Data Protection

GDPR Compliance

General Data Protection Regulation

The Data Protection Act 2018 supplements the EU General Data Protection Regulation (GDPR) which came into force on May 25, 2018 and was designed to modernise the laws that protect the use of personal information.

The new legislation impacts every business in the UK. It is essential that companies are aware of the changes and new obligations and all businesses should register with the Information Commissioner's Office (ICO).

C3C can audit your business and identify where work is needed to be brought into compliance with data protection legislation. We are able to assist with data mapping and conducting data protection impact risk assessments (DPIA).

We can provide the framework for an Information Security Management System (ISMS) and have developed a comprehensive document Toolkit to assist with the implementation of the policies and procedures that may need creating or updating.

Our Data Protection Officer (DPO) service, based on a service contract, provides clients with access to our experienced consultants to help them meet mandatory requirements.
